

# Grounds Watch

**Our playground regeneration is almost complete. A few more finishing touches and, all being well, the children will be able to play on the new equipment after the Easter holidays.**

**Our caretaker, the amazing Mr Yordanov has created the most brilliant compost bins for the children to put their fruit and vegetable peelings directly into on the playground.**

**Our children are working hard to make our school more sustainable. Watch our composting journey, as we've tried and improved on various ideas.**

# Grounds Watch

**Mr Yordanov has built a new planter for Leo class and the children have been working hard preparing it ready to start planting bulbs and seeds.**

**First the children gathered small branches and sticks to fill the base, followed by a layer of dead leaves - this provides a warm base for the plants as it starts to rot. They then got compost from the big compost bins and added this to the raised beds. They've decided they want to grow salad crops (lettuce, cucumber etc), strawberries, some vegetables like beans, carrots and onions and some flowers for the polinators!**

**Outdoor learning is a big part of our curriculum at Loseley Fields and we try to use our large outdoor space as much as possible. Here are our Year 6's out in the grounds doing a scavenger hunt during their recent WW2 day.**

# Grounds Watch

**This term, during break times we have been running a range of activities on the playground. The children have enjoyed dance, sports, chalk drawings, weaving, colouring, bird watching, bubbles, nest building, fun with ice and lots more!**
